DETAILED ACTION

Response to Amendment

The Amendments, filed on 11/07/2003, have been entered and acknowledged by the Examiner.

Cancellation of claims 2, 3, and 49.

Allowable Subject Matter

Claims 1, 4-8, 10-43, 47, 48, 50, and 51 are allowed

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a method of manufacturing an organic light emitting device where a polymer layer formed by self assembly is between an electrode and an organic light emitting layer or is above the organic light emitting layer where prior to forming the polymer layer heat is used to remove physisorbed water from the surface of a electrode before self assemble on that surface.

Regarding claims 4-8, 10-21, and 47, claims 4-8, 10-21, and 47 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 22, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 22, and specifically comprising the limitation of a method of manufacturing an organic light emitting device where a polymer layer formed by self assembly is between a coupling layer and an organic light emitting layer or is above both the organic light emitting layer and the coupling layer where prior to forming the polymer layer heat

is used to remove physisorbed water from the surface of a coupling layer before self assemble on that surface.

Regarding claims 23-43, claims 23-43 are allowable for the reasons given in claim 22 because of their dependency status from claim 22.

Regarding claim 48, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 48, and specifically comprising the limitation of an organic light emitting device where a polymer layer formed by self assembly is between an electrode and an organic light emitting and where the polymer layer has electronic and/or optical properties that vary with the thickness of the layer.

Regarding claim 50, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 50, and specifically comprising the limitation of a method of manufacturing an organic light emitting device where a polymer layer formed by self assembly is between an electrode and an organic light emitting layer or is above the organic light emitting layer where the attraction of the bilayers is by donor/acceptor interaction.

Regarding claim 51, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 51, and specifically comprising the limitation of a method of manufacturing an organic light emitting device where a polymer layer formed by self assembly is between a coupling layer and an organic light emitting layer or is above both the organic light emitting layer and the coupling layer where the polymer layer has electronic or optical properties that vary with the thickness of the layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
